

# Who is nabInvest?

## Overview

The NAB Group established nabInvest in October 2007 with the goal of building a market-leading direct investment management business. We partner with best of breed investment managers, enhancing their capabilities with the strength of the NAB Group's resources.

nabInvest is an integral part of the NAB's Wealth Management business. Our direct investment management capabilities complement MLC's market leading multi-manager wealth management business. Our Wealth Management businesses has over 20 years experience of selecting and partnering with market-leading investment managers, in turn delivering superior outcomes for our investors.

We look to identify and develop high quality investment management businesses, either through direct ownership or partnering with established businesses.

## Our Partners

Investment management teams that partner with nabInvest enjoy the strength and support that can only be provided by one of the world's top 20 financial institutions.

Each nabInvest partner business operates independently, under its own leadership and governance. Our role is to provide support, not control. We want our partner businesses to remain focused on what they do best—generating quality investment outcomes for investors.

In-house and partner funds management teams are specialists in their chosen asset classes. We encourage their independent focus on actively managing and growing their funds under management. Our mutual goal is to convert their potential and promise into an investment proposition that is a leader in their chosen field.
